See us on eBay !

We steadily advise clients to be careful of grading on eBay and that is always good advice. Ebay is something of the Wild West in that it is still a place in which you need to be careful. Sloppy grading, too much hype and over-promotion are common. But great notes do show up there.

“O”and “Original”

A reminder that throughout lists by Olmstead Currency you will find grades often have an “O” or “Original” before the grade.

This means that the notes is indeed original and has never been pressed, trimmed, erased, washed, repaired or altered in any way. More and more we find it difficult to obtain such notes and they are starting to command a premium.

As we acquire notes we are marking the original notes this way. The absence of an “original” designation may not mean it has been processed, likely that we have not had a chance to check it as an old inventory item and mark it as original or otherwise.

Olmstead Currency has been expanding our inventory with the addition of coins, both Canadian and international. We actually started as a coin dealer and developed a focus on bank notes. We have always dealt in coins but less aggressively as we do now.

Very often we are offered coin collections and we do buy them and sell the coins as a retailer. With its move to more advertising we will broaden our inventory and make better use of shows we attend.

If you have Canadian or World Coins we are **The Higher Buyer!** Raw or certified, we are keen buyers of your collection or single coin. We have purchased a considerable amount of gold coins in the past year and have many customers for gold so keep us in mind!
